

Dr Judy Halliday

Director of Industry Development, TechIn SA

Judy has more than 25 years' experience in technology commercialization and innovation as an inventor, founder, investor, academic and industry professional in the public and private sector. She is an inventor on granted patents and has been involved in raising millions of dollars for multiple start-up companies. She has had responsibility for developing and initiating a number of early stage clinical trials under the US FDA Investigational New Drug program. Judy joined TechInSA in September 2016 and has worked with many diverse early stage companies from Bio and MedTech, AgTech and many other deep tech sectors. The TechInSA Industry development team has provided more than \$7.6 million in funding to 51 companies over 18 months which to date has leveraged more than \$30million in additional funding. Judy has been a non-executive director of 7 start-up companies including Nexgen Plants Pty Ltd, and QUE Oncology, Inc,. She has been a venture fund investment committee member for the Medical Research Commercialization Fund and Uniseed.
